Data reported for Machias Seal is reported as total count (90); species not separated. Species ratio

of 70% ARTE and 30% COTE applied. Count spans entire season. Number of nests during

census window not reported

no census conducted, estimate of 300-500 nests on island used average of 300 with 70% ARTE

and 30% COTE species ratio, lower than previous 2 years.

300-500 nests on island used average of 400 with 70% ARTE and 30% COTE species ratio; 33

nests found in marked plots.

300-500 nests on island used average of 400 with 70% ARTE and 30% COTE species ratio; 94

nests found in marked plots

35 nests found in marked plots, used 70% ARTE and 30% COTE species ratio

74 nests found in marked plots, used 70% ARTE and 30% COTE species ratio
